Aspiring to work and grow within a prestigious IT organisation, I seek to advance my professional career as a Frontend Developer. With extensive experience in developing high-end, modern web applications, I leverage the latest tools and technologies to deliver exceptional user experiences. Skilled in designing, implementing, and optimising sophisticated web interfaces.

EXPERIENCE

Team Karimganj Technology Solutions Private Limited

Role : Junior Developer (11/2022 - Present)

- Built and maintained the frontend of a robust trading system using React JS, ensuring optimal performance and user experience. Designed and implemented UI components with the latest file structuring techniques.
- Utilised SASS to extend CSS capabilities, creating a visually appealing and highly responsive user interface.
- Implemented ReCharts for visualising trading activities and data trends, providing users with comprehensive insights.
- Participated in daily code reviews and bug-fixing sessions, ensuring high-quality and reliable code.
- Worked with UI/UX designers to develop pixel-perfect UI components, enhancing the overall user experience.
- Collaborated with the backend team to implement and integrate RESTful APIs, ensuring seamless interaction between frontend and backend.

- Managed code versions and collaborated with team members using GitHub, maintaining an organised and trackable codebase.
- Built a comprehensive admin system to monitor user activities, manage posts, and oversee daily transactions. Implemented features for updating and deleting user posts and tracking transactions.
- Applied Tailwind CSS for designing consistent and elegant UI components in the admin system.
- Employed Redux for efficient state management across the application. Utilised React Query for handling API interactions, ensuring smooth data fetching and synchronisation.

TECHNICAL SKILLS
